Buffing aka (Compounding)

This service is for boats or RVs that are oxidized or faded.

Some boats or RVs could require extra care and pricing may vary.

Wet-Sanding (Used for Restoration of severely oxidized boats)

Wet-Sanding service is for the Boat or RV that is bordering or on the verge of permanent damage. Generally the condition will be the last call before expensive refinishing work is needed. Due to the complexity of this service we provide pricing by way of estimate only.

(RVs will require a free estimate; however you can expect a similar range to boats.)
